

# Brilliant

## TURFMAKER *Junior*

### Good news for lawn care professionals and landscapers

Brillion now offers the **TURFMAKER Junior**, a spin-off of the highly successful 12 foot, **TURFMAKER II**, which featured a 250% larger hopper and new high capacity, precision seed meters.

As the name implies, the **TURFMAKER Junior**, with a **6-foot OR 4-foot seeding width**, is a scaled down, more versatile version of the popular **TURFMAKER II**. The 11-bushel hopper is **275% larger** on the 6-foot model than Brillion seeders of similar width, allowing operators to seed longer between fillings. It is ideal for use in tight working conditions or smaller operations.

**Model SLP206** 6 foot TURFMAKER Junior

**Optional**  
Lift Support  
Bracket

Wheel Mark Levelers Standard Equipment

Requires a **Category I**  
Three-point Hitch.

**Optional**  
Electronic  
Acremeter

**Brillion's**

seed meter  
cups are the  
only ones in  
the industry

that can deliver grass seeds like fine fescues at a high rate without bridging. These high-capacity flow meters evenly distribute grass seed over the seeding width of the machine and can be precisely adjusted for an infinite number of seeding rates.

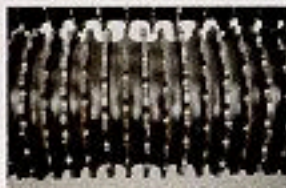

**The TURFMAKER Junior** comes complete with a standard speed-up kit for fast and easy seeding rate changes in the field. It delivers Bluegrass seed at a rate from 13 to 205 pounds per acre and tall fescues at a rate from 13 to 244 pounds per acre with the standard 13-tooth drive sprocket. A 26-tooth speed-up kit, included with the Turfmaker Junior, can double the standard seeding rate.

**Model SLP204** 4 foot TURFMAKER Junior

**Optional**  
Lift Support Bracket

**Optional**  
TURFMAKER Sprockets  
for Rear Rollers
