

# HD 3-SECTION AIR DRILLS

Unit shown with optional  
Frame Mounted Coulters

## MODEL 3007HD

Sometimes BIG things come in small packages. The 3007HD is a good example. 30' of productivity in a package that transports at 10' in width. (2) 100 Bu. bulk hoppers provide 200 bushel of bulk seed or seed and dry fertilizer which minimizes fill time and maximizes productivity. The 3007HD utilizes an 07HD opener which brings a new level of seed placement accuracy to a drill. 15", 4mm blades turning on 205 triple-lip-seal bearings separated by a cast blade separator slice trash and penetrate hard ground better than the standard 13 1/2" drill blades and the "ClearShot" seed tube, used on all Great Plains planters, delivers the seed to the same precise spot in the seed trench each and every time. Big drills also need a big footprint and the 3007HD is at the front of the pack here as well. The center frame floats on eight (8) 15 x 19.5 tires and the wings are carried on (4) 15 x 16.5 tires. BIG Capacity, BIG Productivity, SMALL transport width --- the new 3007HD from Great Plains.

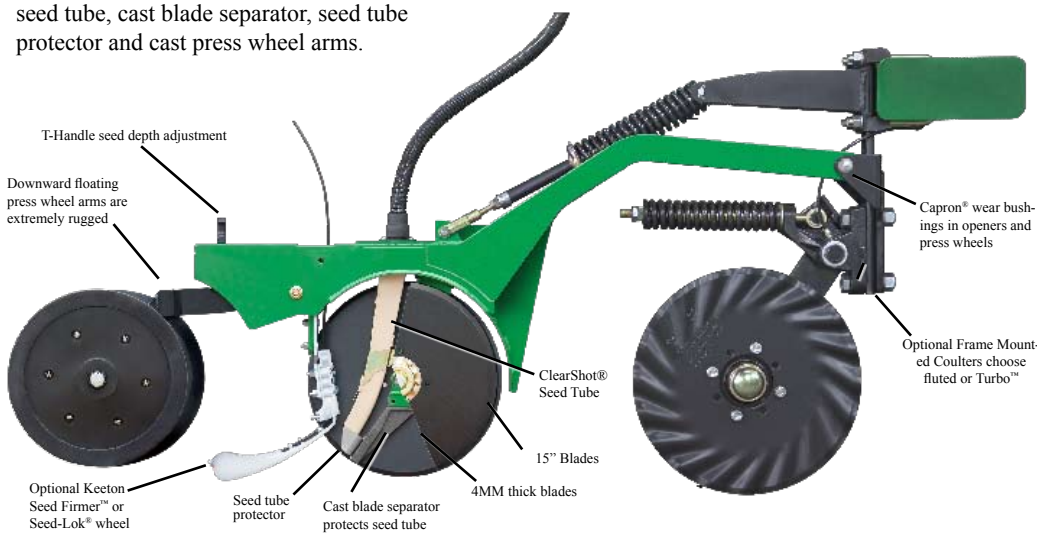

### INCREDIBLY NARROW TRANSPORT

The 3007HD plants at 30' but folds to 10' at it's widest point making transport safe, easy and hassle free.

### 07HD SERIES OPENER

**The 07HD Series Opener** - This opener redefines tough; with its 15" blades, planter seed tube, cast blade separator, seed tube protector and cast press wheel arms.

### Press Wheel Choices

**3' x 13" Center Rib** - This design firmly presses directly over the seed with the center rib of the wheel creasing the soil. This crease allows the crust to crack open for even seed emergence.

**1' x 12" Double-V** - This design closes the seed trench with an aggressive pinching action. It provides excellent depth control in most soil conditions.

**Wedge** - This design is the "Best of Both Worlds," with an aggressive tapered edge. It closes seedbeds in firm soil but a large "footprint" allows it to stay on top of loose soil.

### HYDRAULIC DOWN PRESSURE

The 3007HD air drill features a unique hydraulic down pressure system which through parallel linkage maintains opener to ground geometry.

### HIGH CAPACITY

(2) 100 bushel hoppers, a built in load/unload auger, wide walk boards and ladders combine to make an air drill that keeps you in the field.

### FLOTATION TIRES

(8) 15 x 19.5 tires on the center frame and (4) 15 x 16.5 tires on the wings provide excellent flotation and reduced compaction.

### SPECIFICATIONS

Model Name	3007HD
Row Spacing	7 1/2", 10", 15"
Number of Openers	48, 36, 24
Working Width	30'
Transport Width	10'
Transport Clearance	13 1/2"
Transport Height	11' 2"
Transport Length	37'
Seedbox Capacity	200 bu.
Center Frame Tires	(8) 15x19.5
Wing Frame Tires	(4) 15x16.5
Opener Down Pressure	Up to 240 lbs.
HP Requirements (est)	275 to 400

Note: All specifications subject to change without notice.

### STANDARD EQUIPMENT

- Narrow Transport Width
- 07HD Series Openers
- 200 Bu. Box Capacity
- Airmeter/Tower Seed Delivery
- 3-Section, Forward Fold, Pulltype
- Hyd. Weight Transfer
- High Flotation Tires
- ClearShot Seed Tubes
- Floating Tongue

### OPTIONS

- Frame Mount Coulters
- Fluted or Turbo Blades
- Choice of Press Wheels
- Seed-Lok Firming Wheel
- Keeton Seed Firmers
- Markers
