H.P. Requirements	250-350	100-290	275+	275+	200+

Note: All specifications subject to change without notice.

A 1,600 gal. cart or a 1,600 + 400 gal. cart can be pulled behind the YP-2425, YP-30, and YP-40 for starter and /or high rate fertilizer.

Designed to flex in the field up to 20 degrees up and 20 degrees down. Couple that with a floating hitch and this unit can follow the toughest terrain.

(10) 15 x 16.5 skid steer tires on the YP-40 provide 2,300 sq. inches of flotation with a 3" sink. Only 9 - 11 lbs. / sq. in. depending on opener choice and row spacing.

YP-40 features interchangeable bulk hoppers. The operator can easily change from the seed company bulk box to a 82 or 150 bu. hopper.

The new standard in singulating planting equipment!

The new YP-30 & YP-40 redefine planting flexibility with a choice of 3 openers and 8 row spacings. These 30' and 40' frames can be equipped with **10HDP Series** openers on 7 1/2" spacing for 7 1/2" wheat and 15" soybeans, or **20P Series** opener with side depth gauging wheels that can plant on 8" or 10" row spacings, or **25 Series** openers as narrow as 10" that offer super accurate seed placement on any seed it plants. This heavy duty planter also has the ability to pull a 2,000 gallon fertilizer cart or a 1,000 gallon semi-mounted fertilizer cart (coming soon). 400 gallons of starter fertilizer can be mounted "on board". **Big, tough, versatile, productive** are just a few words that describe the new YP-30 & YP-40.

25 Series

The 25 series opener is setting a new standard for spacing and depth control. 15", 4mm blades are offset 1/2" for unmatched penetration. Clear-Shot® seed tubes with finger-pickup meters for corn and Singulator-Plus® for other crops provide excellent seed placement for uniform emergence.

10HDP Series

The 10HDP series singulating opener features rear depth gauging press wheels in your choice of 3 styles. 11" of stagger between rows help clear residue and the parallel linkage provides 10" of vertical travel with up to 500 lbs of down pressure per row.

20P Series

The 20 series opener offers singulated seed on a small, heavy duty parallel linkage opener. 13 1/2", 4mm blades with 2" side depth wheels allow for narrow row spacing with accurate depth control. Ideal for stale seedbed planting.
