YP-4010HD

YP-4020

YP-4025

The new standard in singulating planting equipment! The new YP40 redefines planting flexibility with a choice of 3 openers and 7 row spacings. This 40' frame can be equipped with 10HD openers on 7½" spacing for 7½" wheat, 15" beans, and Twin Row 30" corn, or, 25 series openers as narrow as 10" that offer super accurate seed placement on any seed it plants. This heavy duty planter also has the ability to pull up to a 2,000 gallon fertilizer cart or a 1,000 gallon semi-mounted fertilizer cart (coming soon). 400 gallons of starter fertilizer can be mounted "on board". Big, tough, versatile, productive are just a few words that describe the new YP40.

BULK HOPPERS

YP40 features interchangeable bulk hoppers. The operator can easily change from the seed company bulk box to an 82 bu. bulk hopper or a 150 bu. bulk hopper (shown).

OPENER OPTIONS

10HDP Series

The 10HDP series singulating opener features rear depth gauging press wheels in your choice of 3 styles. 11" of stagger between rows help clear residue and the parallel linkage provides 10" of vertical travel with up to 300 lbs of down pressure per row.

20 Series

The 20 series opener offers singulated seed on a small, heavy duty parallel linkage opener. 13 1/2", 4mm blades with 2" side depth wheels allow for narrow row spacing with accurate depth control. Ideal for stale seedbed planting.

25 Series

The 25 series opener is setting a new standard for spacing and depth control. 15", 4mm blades are offset 1/2" for unmatched penetration. Clear-Shot[®] seed tubes with finger P.U. meters provide excellent seed placement for uniform emergence.

2000 GALLON CART (opt)

A 1,600 gal. cart or a 1,600 + 400 gal. cart can be pulled behind the YP40 for starter and /or High Rate fertilizer.

SUPERIOR FLEX

Designed to flex in the field up to 20 degrees up and 20 degrees down. Couple that with a floating hitch and this unit can handle the toughest terrain with ease.

FLOTATION TIRES

(10) 15 x 16.5 skid steer tires provide 2300 sq. inches of flotation with a 3" sink. Only 9 – 11 lbs. / sq. in. depending on opener choice and row spacing.

SPECIFICATIONS

Model Name	YP 4010HDP	YP-4020P	YP-4025
Working Width	40'	40'	40'
Transport Width	14' 10"	14' 10"	14' 10"
Transport Length		42'	
Transport Clearance		21"	
Tires	10) 15 X 16.5 SKID STEER		
Seed Capacity	Seed Company Bulk Box, 82 bu Poly Hopper, 150 Bu. Poly Hopper		
Wing Flex	20 Degree Up, 20 Degree Down		

STANDARD EQUIPMENT

3-Section, Forward Fold, Pulltype	Ability To Use Bulk Boxes
Telescoping Tongue	High Flotation Tires
Bulk Seed (up to 150 bu.)	Population Monitor (IntelliAg)
Air Delivery to Meters	Hydraulic Drive
Singulated Metering
