

# KINZE WAGONS

- Model 650
- Model 850
- Model 1050
- Scales
- Harvest Support

## ACCURATE WEIGHTS - TO HELP YOU MONITOR AND MANAGE WHAT YOU GROW!

Save time by determining weights in the field instead of hauling loads to town!

In-field measurement of yields . . . lets you compare hybrids and their response to various soil types and farming practices!

Digi-Star EZ 2000

## Electronic Scales

### ■ Excellent Management Tool!

KINZE Electronic Scale Packages - Digi-Star<sup>®</sup> electronic components - lets you monitor what you grow and sell! With these factory-installed options you can check yields to compare different fields, soil types, hybrids, fertilizers, tillage systems or planting practices (i.e., row vs. drilled beans), etc.

### ■ Great Time Saver!

Weigh your crop in the field, instead of hauling it to town! You can obtain exact weights as grain goes into on-farm storage and as it comes out. Custom harvesters can use the scale for by-the-bushel rates for harvesting.

### ■ Immediate Data Source!

Eliminate the guesswork. Scales help you make informed decisions on how to manage your farm for performance and profitability.

### ■ Easy to Use, Read and Rely

**On!** The Digi-Star EZ 2000 console features an oversized, back-lit LCD display. Scrolling "help" messages answer questions about the indicator's operation without needing to refer to the manual. Plus, accuracy you can count on . . . with the best basic weigh up and weigh down capability on the market today!

### Electronic Scale Package for the 850 Harvest Commander™ Grain Auger Wagon!

This traditional 3-point weigh beam system includes two 3 3/4" (high-strength) weigh spindles, one 3 3/4" hitch weigh beam with mounting components, junction box, cables and Digi-Star EZ 2000 printer-ready console. (Scale package not available for 850 SOF-TRAK.)

Single clevis hitches are included with all scale packages. Wiring is protected in a full-length tube under the grain tank. Options to capture weight information include a Dot Matrix Roll Printer or a Data Down Loader Kit for transferring load data to computers with Windows 98/2000 operating systems.

### Electronic Scale Package for the 1050 Harvest Commander™ Grain Auger Wagon!

Two compression-type CT loadcells and a 3 3/4" hitch weigh beam form the three point scale system unique to the 1050 Harvest Commander™ Grain Auger Wagon. The same system is used for Row Crop, Sof-Tred or Sof-Trak equipped 1050 wagons. All other components (cables, junction box, EZ 2000 console) are the same as used on the 850 Harvest Commander.
