

PATU IIII

DC 40

WOODCHIPPER

PATU

DC 40 WOODCHIPPER

Patu DC 40 is a 3-point hitch mounted woodchipper for tractors 15–35 hp. It chips material up to 4" diameter. The large diameter fan blows the chips efficiently onto a truck or back to the ground. The discharge chute rotates 360° and thus enables the chips to be blown to the desired direction.

The DC 40 MF features an efficient manual feed. The three chipping knives pull in the most of the material with no pushing by the operator.

The chip size can be adjusted between 5/32" and 1/2". The infeed speed depends on the chip size. With a chip size of 1/4" the feeding speed is approximately 1' / second. The feed chute of the Patu DC 40 is on the right hand side of the chipper, which enables the operator to work away from the road traffic.

The DC 40 HF has a hydraulic power feed. The feeding speed can be adjusted with a flow control valve.

The feed chute can be folded up and latched. This makes road transport easy. The rear mounted feed chute makes the DC 40 very well suitable for use in orchards.

TECHNICAL SPECIFICATIONS

PATU DC 40

MODEL	DC 40 MF	DC 40 HF
Infeed	Manual	Hydraulic power feed, connected to tractor hydraulics.
Max. feed diameter	4" (100 mm)	
Knife setting	5/32" – 1/2" (4–12 mm)	
Chipping disc – diameter	17" (430 mm)	
– weight	99 lbs (45 kg)	
Number of knives	3	
Discharge – height	71" (180 cm)	
– rotation	360°	
Power requirement	15–35 hp 540–1000 rpm	
Weight	403 lbs (183 kg)	550 lbs (250 kg)
