

# PowerBox™

## 800 Amp Battery Booster

A dead battery can ruin your day if you are not prepared. Now you can provide your PowerBox™ with even more versatility through the addition of an **800 Amp Battery Booster** unit.

The **800 Amp Battery Booster** is compact in structure and designed to be powered by your existing PowerBox™ unit. The booster bolts directly to the PowerBox™ or can be mounted remotely.

The booster is engineered for ease of operation and is powerful enough (with high cranking assist of 800 Amps) to start numerous vehicles between charges.

### Features:

- Integrated 12/24 volt, 90 Amp continuous output.
- Large amperage allows users to start the heaviest of vehicles and/or equipment.
- Built in safety mechanism prevents live cables from being connected to a “dead” battery or accidental contact with other metal surfaces.
- Durable, weather resistant casing and control panel.
- 17' heavy duty cables with serrated jaws, tightly grip all top and side post terminals.
- Twist-lock connections at booster unit.
- Commercial grade components.
- Maximum Open Circuit Voltage (OCV)=19.2v (in 12v mode), 31v (in 24v mode).

### Typical Applications:

The **800 Amp Battery Booster** is an ideal PowerBox™ accessory for anyone (including construction, farms, salvage/scrap yards, military, municipalities, vehicle/equipment fleets, and rental facilities, etc.) who require the ability to:

- Jump start cars, trucks, earth moving equipment, tractors and agricultural equipment, buses, etc.

### Dimensions:

- Height: 22"      Width: 8"      Length: 48"
