High Visibility Buckets

The High Visibility Dirt Bucket on the Left vs. the Dirt Bucket on the Right

Thomas has maintained the “Built Thomas Tough” tradition in every thing that we manufacture. The newly developed Dirt Buckets are constructed using thick 7 ga. steel plate, heavy-duty abrasion resistant 5/8”x 6” formed cutting edge pre-drilled to accept the reversible Bolt-On cutting edge, 1/2”x 3” reinforcing wear bars for extra strength in the heavy digging. The High Visibility Bucket provides excellent visibility for leveling, back-dragging, digging and general duties on the construction site. The Dirt Bucket with its shorter front lip provides increased breakout force for heavy digging applications.
