

STRIP TILL 2000 WIL-RICH

Le strip till est très bien fait. C'est le seul à avoir le coutre en avant des tasse résidus. C'est un avantage car les débris sont coupés avant d'être tirillés de part et d'autre. Aussi les rouleaux arrière manquent trop souvent de pression pour faire un bon travail. Dans le cas de cette machine, c'est le poids total qui est transféré sur ces rouleaux et qui servent de support pour contrôler la hauteur du châssis principal.

Heavy-duty 7 x 7 x 3/8 inch toolbars are designed for years of hard-working productivity.

Features

Strip-Till Row Units

Redball's heavy-duty row units utilize a parallel linkage to maintain uniform depth control. This unique design assures consistent tillage

and fertilizer placement in fields with changing contours and soil conditions.

- 3-Point or Floating Pull Type Hitches
- Rear Lift Assist Wheels
- Front Lift Assist Wheels

Parallel linkage ensures consistent depth and may reduce horsepower requirements

Height-adjustable rubber gauge wheels pin down the residue as the coulter slices

Large diameter 20 in. coulter blade easily slices through heavy residue and soil

13 in. residue managers trail coulter, efficiently cleaning the strip

Redball knife penetrates soil profile 4 to 8 in. while minimizing surface disturbance

Independently-mounted berm-building disks increase soil contact, creating a uniform seedbed

Options

- Wing Gauge Wheels
- Row Marker System

Models

Model 2000 Rigid

Length: 11 ft., 6 in.

For 4/36, 4/38 and 4/40 in. row spacings

Model 2000 Rigid

Length: 15 ft.

For 6/30 in. row spacings

Model 2000 Rigid

Length: 19 ft.

For 6/36, 6/38, 6/40 and 8/30 in. row spacings

Model 2000 Single Fold

Length: 28 ft.

For 8/36, 8/38 and 8/40 in. row spacings

Model 2000 Single Fold

Length: 30 ft.

For 12/30 in. row spacings

Model 2000 Double Fold

Length: 40 ft.

For 12/36, 12/38 and 12/40 in. row spacings

Model 2000 Double Fold

Length: 40 ft.

For 16/12/30 in. row spacings
